RE: Project ID 2240-05-71  
Milwaukee Avenue Resurfacing  
Teut Road to CTH W  
City of Burlington  
Racine County

As part of the Bipartisan Infrastructure Law (BIL), the City of Burlington has received funding from the Wisconsin Department of Transportation (WisDOT) for the resurfacing of Milwaukee Avenue between Teut Road and CTH W. Please see attached Project Location Map. The purpose of the project is to address the deteriorating pavement condition and the decreased ride quality along this 1.7-mile segment of Milwaukee Avenue.

The proposed project includes milling the existing asphalt surface and overlaying with a minimum of 3-inches of new asphalt pavement on driving lanes and shoulders. Shaping existing gravel shoulders is anticipated. Other improvements include removing and repairing damaged curb and gutter, adding curb and gutter to the Walton Road left-turn lane, curb ramp and ADA updates, streetscaping improvements, new pavement marking and roadway signage updates. The existing path on the south side of the roadway will remain in place. The ground disturbing footprint is not anticipated to extend beyond the existing roadway shoulders and may extend up to 5 feet along the Walton Road left-turn lane to facilitate curb installation and 3 feet beyond the existing curb ramps to facilitate ADA updates. Construction is anticipated for 2023.

Kapur & Associates, Inc. has been retained by the City of Burlington to provide engineering design services, prepare construction plans, and **solicit feedback from interested parties**. As part of this project, engineering field work will be conducted by field survey crews beginning in June 2022. Typical field survey operations will include collecting topographic information and setting vertical and horizontal control points. It may be necessary for our crews to enter upon your property, but no one will need to enter your home or garage. We ask for your cooperation so that we may obtain accurate information. The locations of the field work are NOT an indication of where possible improvements will ultimately be constructed. Per State statute 84.01(10), WisDOT or its authorized representatives may enter private lands for the purpose of making field surveys or inspections, and we ask for your cooperation in helping us with the data gathering efforts for this project.

While some instruments of public involvement will not be feasible due to the condensed timeline of this project, we are still seeking the input of interested parties and property owners. If you have any comments or questions about the project or field work, please contact Aaron Bubb, Kapur & Associates, Inc. Project Manager at (414) 751-7230, [abubb@kapurinc.com](mailto:abubb@kapurinc.com) or Peter Riggs, Director of Public Works at (262) 342-1181, [priggs@burlington-wi.gov](mailto:priggs@burlington-wi.gov). **We welcome your feedback and participation in this project.**

Sincerely,

Kapur & Associates, Inc.
