RICHARD A. LODLE
Fire Chief

City of Burlington
FIRE DEPARTMENT

165 W. Washington St.
262-763-7842

Burlington, WI 53105
FAX 262-767-8602
www.burlington-wi.gov

Dear Citizens:

I wrote my first annual report correspondence to you twenty years ago. In reflecting over those twenty years, I believe 2012 to be one of the most significant years in the history of the City of Burlington Fire Department. First of all, while many volunteer departments are struggling with a shortage of firefighters, your city fire department currently has forty-one volunteer members plus four career (full-time) employees. These individuals responded to 170 calls for service during 2012.

Mid-year, Burlington Mayor Robert Miller formed a task force to explore opportunities for enhanced cooperative efforts in providing fire and emergency medical services within the greater Burlington community. This task force is composed of representatives from the city and town of Burlington governmental entities, the City of Burlington Fire Department, the Town of Burlington Fire Department, and the Burlington Rescue Squad. The task force recommended an outside study be completed by the McGrath Consulting Group, Inc. All governing boards approved and the study began during the first quarter of 2013. The final report is expected around mid-year.

Significant also is that the city council, upon recommendation of the current volunteer fire chief and the city administrator, approved and budgeted for, the first full time fire chief in the 136 year history of the City of Burlington Fire Department. Following an extensive search and selection process, the new chief is expected to begin his tenure here in June.

I would like to personally take this opportunity to thank all of the governmental leaders, police and fire commissioners, city staff, fellow firefighters, and citizens that I have had the pleasure to work with. Twenty years ago, I stated that the department faced many major challenges and opportunities. I strongly believe that since then, and with your help, we have completed many noteworthy achievements as a fire department. In looking forward, we are again at a time when many new challenges and opportunities await us.

In closing, the January 30, 2013, Echo Lake Foods fire resulted in the largest mutual aid response to date in Wisconsin. Through that effort, 60% of the structure was saved, and some production has already returned, but that is material for the 2013 annual report.

Sincerely,

Richard A. Lodle

Richard A. Lodle
Fire Chief

Gerald Nicholas Schilz

Birth: April 6th 1935
Death: June 21st 2012

Jerry was a City of Burlington firefighter from 1959 until 1977 when he was promoted to the position of Fire Inspector. Jerry, being the city's first full-time Fire Inspector, was instrumental in molding the department's Fire Prevention Bureau. He was influential in developing the fire education program for the Burlington School District. He remained in that position until his retirement in 1997.

Jerry married Nancy Ann Robers on September 29th 1956. Jerry enjoyed baseball. He played hardball for 10 years after high school and then started the Men's softball league in Burlington. He also coached youth hardball for many years. He greatly enjoyed his family and grandchildren and was also an avid Brewers fan. Jerry hit his final home run at Aurora Memorial Hospital in Burlington on June 21, 2012 surrounded by his loving family.

Rest in Peace, Jerry. We'll take it from here.

City of Burlington Fire Department

Mission Statement:

The goal of the Burlington Fire Department is to protect and preserve the lives and property of the citizens and visitors of the City of Burlington and it's surrounding communities from the adverse effects of fires, natural disasters or the exposure to other hazardous conditions.

We achieve this objective through an effective fire prevention & education program, an established training curriculum and prompt response by a diverse organization of career and volunteer personnel.

Before 1877 there was no organized fire department in Burlington. In 1864 and then again in 1874 the Pliny-Perkins flour and grist mill burned twice. In those early years cisterns were built in various locations to provide a source of water. And fires were fought using small hand pumps and leather buckets. **October 1877:** It was determined that Burlington needed organized fire protection. Forty-five volunteers banded together to form Hose Co. #1. Five hundred dollars was raised to purchase a hand operated fire pump, a hose reel and five hundred feet of hose for their fire suppression efforts. All firefighting equipment had to be pulled by hand to fire scenes. The only means to alert firemen is a large bell on top of the city hall. **March 1878:** The Hook and Ladder Co. was formed with a membership of thirty-five men. The two companies were headquartered in the rear of the old city hall. **February 1879:** The newly organized fire department prevented what could have been a disastrous fire in the Klingele Store building. **July 1887:** Additional clapper is installed on fire bell to distinguish sound from bells on trains that sometimes confuse firemen. **March 1896:** Hose Co. #2 is organized. **August 1896:** New steam whistle at the water works pumping station replaces fire bell.

1900 - 1909

August 1902: Ordinance 17 is passed – First fireman to take hose cart or other apparatus to a fire will receive \$2. **Sept 1902:** Burlington Malting Company destroyed by fire. It is the most disastrous fire in Burlington history to this time. **May 1907:** New fire alarm system is installed in Burlington. Fire alarm boxes are placed at 10 strategic locations.

1910-1919

April 1910: Mayor H. E. Zimmermann establishes the Police and Fire Commission. **October 1915:** The department replaces its horse drawn fire apparatus with Nash truck.

1920-1929

January 1924: The department receives a new Seagrave pumper and the Nash truck is replaced with a new Peter Pirsch pumper. **March 1928:** The fire department rethreads all apparatus, fire hydrant and fire hose couplings to meet the national standard.

1930-1939

April 1930: Burlington fire department protects the Towns of Burlington, Wheatland and Lyons. **February 1934:** Burlington and Lake Geneva have a reciprocal contract for aid with serious fires.

1940-1959

October 1945: Racine County assigns a new trailer mounted fire pump and equipment to the city for civilian defense during the war.

In 1954 an FWD 1,000 gallons-per-minute engine was purchased. About this time, a U. S. government surplus truck with a 300 gallons-per-minute pump was added.

1960-1979

March 1969: The current Firehouse at 165 W. Washington is built.

June 1974: A new ladder truck and pumper are delivered to the fire department. The ladder truck has an aerial ladder that can reach 85 feet and the pumper is capable of delivering 1000 gallons of water a minute. Both pieces of apparatus were built by the Peter Pirsch Company in Kenosha, WI. **July 1977:** St. Mary's Church is gutted by fire.

Sometime in the early 1970's a new radio paging system is used to alert members in case of a fire.

In 1978 a Ford 1 ton 4x4 pickup with slide-in pump and tank replaced the government truck.

1980-1989

In 1980 Engine 920, a Peter Pirsch engine, joined the fleet. The slide-in pump and tank was moved to a 1986 Chevrolet 4-door 1 ton dual wheel pickup truck. During 1988, Engine 925 replaced the 1954 FWD engine.

1990-1999

1996 was a big year for apparatus purchases with the arrival of Platform 924 and Engine 923. In 1997 Pickup 922 replaced the 1978 Ford.

2000-2009

In February 2001 the 1980 Pirsch was replaced with a new Pierce engine, Engine 920.

In 2005 the eighty five foot Pirsch was replaced with a 2005 Pierce 75 ft. Aluminum Aerial Ladder truck with a 1500 GPM Pump.

Past Fire Chiefs

John T. Prasch (1912 – 1919)
 John McCourt (1919 – 1925)
 Morris Schneider (1925 – 1932)
 Roy Porter (1932 – 1960)
 Clarence Scharf (1960 – 1970)

Robert Birchler (1971 – 1976)
 John R. McCarthy (1977 – 1981)
 Charles Hewitt (1982 – 1986)
 Richard VandeSande (1987 – 1993)
 Richard A. Lodle (1993 – Present)

Prior to 1912 Frank Beller was Fire Marshall.

Daniel M. Fallon

Fire Engineer

Wesley W. Miner

The City of Burlington utilizes four full-time members at the fire department. Duties of these individuals include: driver/operator of department apparatus, fire suppression, fire prevention & education activities, fire inspection and code enforcement, plan reviews, apparatus maintenance, facilities maintenance, clerical/administrative work, public relations and post-dispatch of Burlington EMS. Engineers work schedule is a 24 hour duty shift followed by 48 hours off, while the Inspector works a 40 hour/week shift. This work schedule is to insure 24 hour fire protection and prompt response in the case of an emergency.

City of Burlington Fire Department

2012 Staff Activities

-Trainings: Fire Department members participated in 2,058 hours of company drills, general drills, MPO trainings, state certified fire classes and other miscellaneous elective drills.

-Fire Calls: Fire Department members spent a total of 1,903 hours at fire incidents or during clean-up after fire calls. Types of incidents included are general fire alarms, mutual aid alarms, company #4 alarms and non-emergency alarms.

-Fire Prevention: Fire Department personnel spent 2,900 hours on fire prevention. This category includes fire inspection and code enforcement, public education, public relations and fire investigations.

-Station/truck maintenance: Hours spent on apparatus and firehouse maintenance totals 1,145 hours.

-Clerical Duties: 1,825 hours were spent on the day-to-day activities in the alarm office. They include but are not limited to data entry, plan reviews and telephone/radio communications.

Alarm Office Log

Telephone Log:

Emergency Line 140 calls
Business Line 1,790 calls
Private Line 70 calls
Total 2,000 calls

Dispatch Log:

Fire Incidents Dispatched 170
EMS Incidents Dispatched 1,116
Total Incidents Dispatched 1,286

Fire Chief Lodle engaging in public relations at a press conference.

City of Burlington Fire Department

Fire Prevention Bureau

It is commonly said that the fire service is the only organization that tries to put itself out of business. The City of Burlington Fire Department utilizes an exceptional program for the prevention of fire and other emergencies. This goal is accomplished by three major components; public education/public relations, fire inspection/code enforcement and post-fire investigation.

Public Education/Public Relations is a critical component in the overall goal of the fire service. Throughout the year we attend Public events offering educational pamphlets, displaying our Fire Apparatus and Equipment, and providing Adult Fire Extinguisher training. During The National Fire Prevention Week we visit the schools featuring an "In the Classroom" approach; this provides the students an opportunity to be one on one with a Firefighter. During 2012, on 40 different occasions department personnel spent 500 hours educating the public about the importance of fire safety.

Fire inspection and fire code enforcement is at the forefront of the Fire Department. Through education we provide businesses, apartments, and health care facilities the tools they need to comply with State and Local fire Codes and to keep their clients and residents safe. 1,000 fire inspections were completed last year with a sum of 2,000 hours dedicated to those inspections.

Through Fire Investigation we determine cause and origin of a fire which gives the Fire Department the tools needed to educate the community and determine if a criminal act was committed. A monetary value of what is saved and lost is also determined by investigations. A total of 54 hours were spent on six different fire investigations in 2012. The total combined value of all properties investigated totaled \$21,619,001. Only two percent of the total value was lost by fire while ninety eight percent was saved by the fire department.

City of Burlington Fire Department

Department Training Program

The Burlington Fire Department training program is a comprehensive, aggressive program dedicated to training its members in the fundamentals of fire suppression, property preservation fire prevention, fire inspection and investigative procedures. Trainings for department members are conducted on a weekly basis in various formats and styles. The Fire Chief oversees the department's training program and instructors can range from department officers, career personnel or even department members.

Every month the department meets as a whole and members participate in a "General Drill." Fire companies also meet once a month and company officers supervise "Company Drills." Members seeking the rank of Motor Pump Operator (MPO) as well as current MPO's attend monthly driver/operator trainings. Also available to department members are a variety of extra and/or elective drills through-out the month.

Both career and volunteer members of the Burlington Fire Department continue to develop better skills and techniques through training. The fulltime staff works hand-in-hand with volunteer members to enhance training in all areas of their duties.

City of Burlington Fire Department

2012 Incident Responses

The City of Burlington Fire Department responds to a wide array of emergency incidents. The type of alarm is classified into the following categories: General Fire Call, Mutual Aid Call, Company #4 Call and Non-Emergency Call. The type of alarm is assigned to the incident based on the reason for fire department response.

General Fire Call: Structure Fires, Fire Alarms, Vehicle Fires, Haz-Mat and Brush Fires.

Mutual Aid Calls: Any response to an agency outside the city.

Company #4 Calls: Motor Vehicle Accidents, CO Alarms and EMS Assists.

Non-Emergency Calls: Burning Violations, CO Alarm Problems and Good Intent Calls.

In 2012 The City of Burlington Fire Department responded to 170 alarms. Below and on the following pages you will find a breakdown of those incidents, including charts, graphs and a chronological list of every call.

City of Burlington Fire Department

2012 Incident Responses (Continued)

City of Burlington Fire Department

2012 Incident Responses (Continued)

City of Burlington Fire Department

2012 Incident Responses (Continued)

Type of Incident for 2012

Incident Type Breakdown:

False Alarms & False Calls: Malicious or Mischievous false alarms, Fire protection system malfunctions and Unintentional alarm transmissions.

Fire Incidents: Building fires, Cooking fires, Chimney fires, Trash fires, Vehicle fires and Brush fires.

Hazardous Conditions: Flammable or hazardous liquid spills, Gas leaks, Carbon monoxide incidents, Electrical wiring/equipment problems and Downed power lines.

MVA's / EMS Assists: Motor vehicle accidents (MVA), Medical call assistance and Victim removal from stalled elevators.

Service Call / Good Intent Call: Smoke or odor removal, Assist police and/or other agency and Dispatched but cancelled en-route.

City of Burlington Fire Department

2012 Incident Responses (Continued)

Types of Property Responded to by the Fire Department

Property Type Breakdown:

Residential: 1 or 2 family dwellings, Multifamily dwellings, Apartment buildings and Commercial hotel/motels.

Special Properties: Highways, Residential streets, Commercial street, Railroad right-of-ways and Vehicle parking areas.

Health Care: Hospitals, Clinics, Doctor offices and Nursing homes.

Mercantile/Business: Grocery stores, Gas stations Vehicle sales, services or repair, General retail and Business offices.

Manufacturing/Processing: Mostly refers to any business that manufactures and/or processes something. Generally these properties are found in the industrial parks.

Educational: High school, Junior high school, middle school and Adult education center or college.

Assembly: Bowling establishments, Swimming facilities, Convention centers, Restaurants and Bars.

Undetermined: Refers to an incident when the department was notified but cancelled before arriving at the location or when the department receives a request to staff another agencies firehouse with a piece of apparatus and personnel.
